**José Luis Rodríguez Zapatero**

Secretario General del PSOE

Welcome to our Website. We, the Socialists believe that the new technologies of information and communication can bring the citizens closer to their political representatives. Therefore, we want this Website to be the channel for you to actively participate in this collective project that we share, bringing in your ideas, proposals, illusions, solutions, worries, and anything you think could be interesting in order to build a common future, better for all of us.

This Website is being built, on a daily basis, by hundreds of volunteers from the Spanish Socialist Workers Party, as well as by sympathisers, who believe that INTERNET constitutes the right means to bring us closer to the citizenry. They put their work and commitment in it, so that you can be informed about our activities, about our political proposals, about our working papers, about any news that could be of your interest...but also for you to contribute with whatever you find appropriate.

I hope it will be interesting for you and it will make you have **psoe.es** as the reference Website within your political interests. Thanks indeed for visiting us. We are looking forward to your contributions.

José Luis Rodríguez Zapatero
