

VI.a.2. POBLACIÓ ESTACIONAL. LA PRESSIÓ HUMANA DIÀRIA

VI.A.2. SEASONAL POPULATION. DAILY HUMAN PRESSURE.

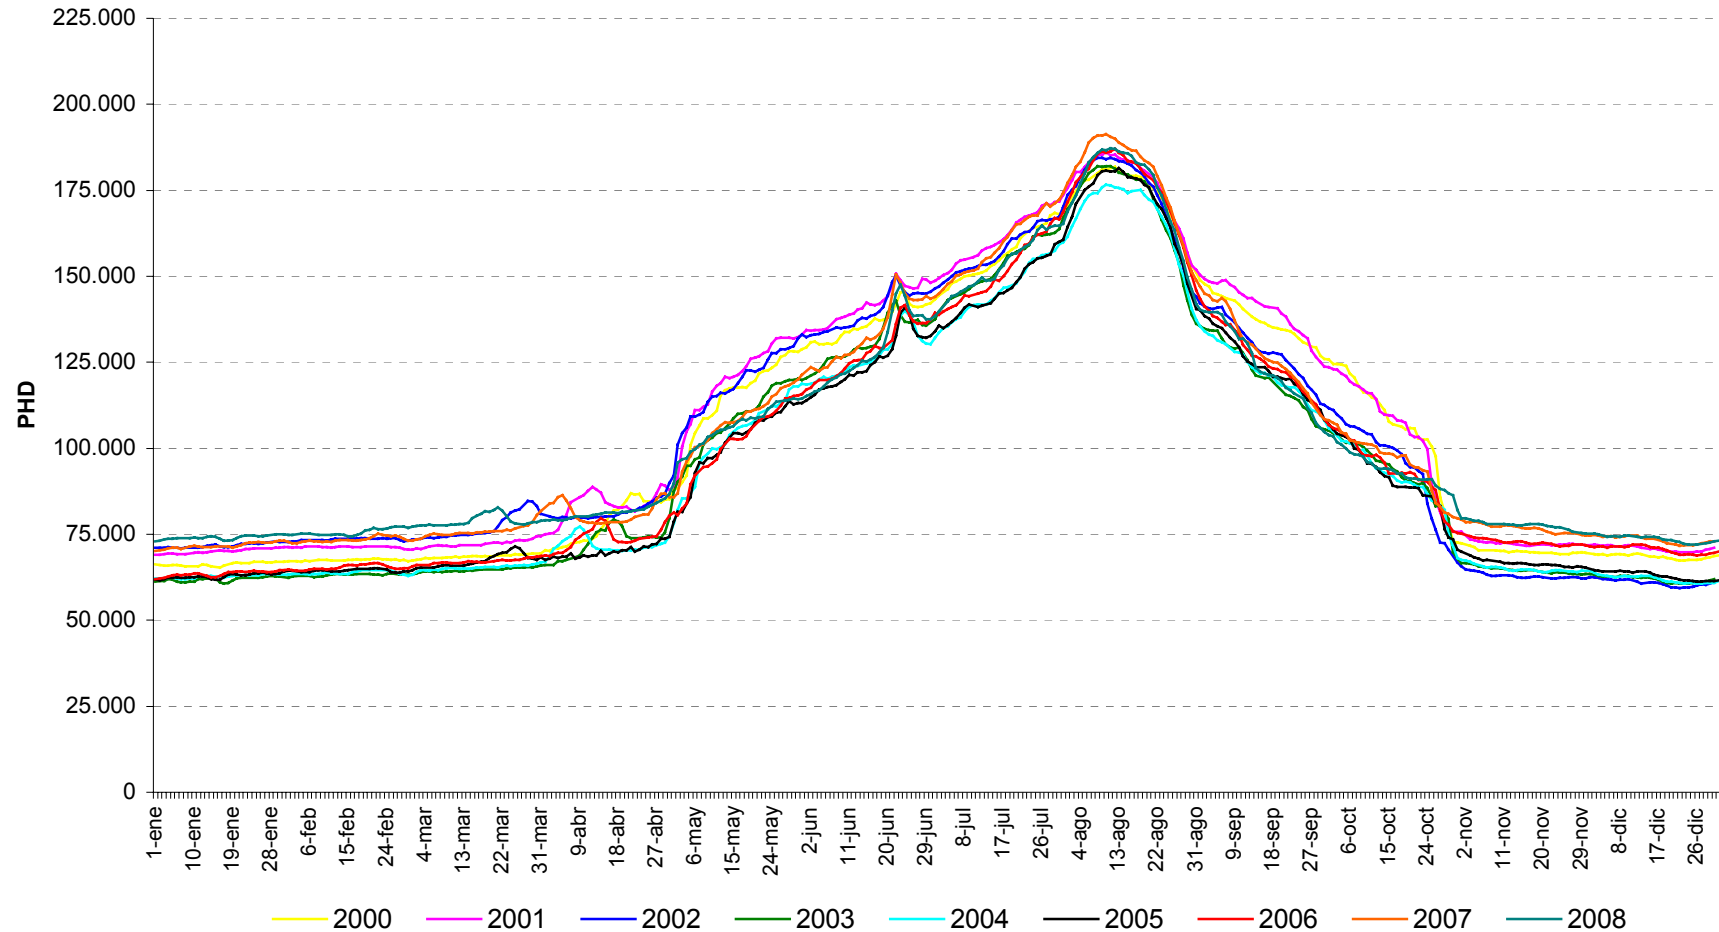

La “pressió humana diària” és un indicador que pot servir per posar en evidència el fet que l’origen de moltes pressions sobre els recursos naturals i bona part dels problemes ambientals de Menorca es deriven de la magnitud de la població que està present a l’illa en cada moment. Per altra banda és el millor exponent de la forta estacionalitat en la que es basa l’economia menorquina actual, de la ma del turisme.

Sumant i restant les persones que entren i surten respectivament cada dia de l’illa al saldo de població del dia anterior, s’obtenen les variacions diàries de la població a Menorca. Cal una hipòtesi de partida. En el nostre cas partim del cens de 1996, atribuït a dia 1 de gener de 1996. A començaments de cada nou any es segueix la sèrie a partir de la xifra acumulada de l’any anterior, simplement modificada amb la variació natural de la població (naixements menys defuncions).

Aquest sistema només compta la pressió humana superior a una jornada, perquè pren la variació sobre el dia anterior. És a dir que es basa en aquelles persones que passen una nit com a mínim a l’illa.
